LAWN GRASSES

**We Pay Postage on Grass Seed
Anywhere Within U.S.**

You'd be surprised to see the great variation in grasses. If you examined them closely you would find a difference in color, in width of blade, in habit of growth; some grow close to the ground, others grow upright. Some are tough and bunchy, others are tender and easy to cut. We study all of these characteristics and blend varieties that combine to form a good turf, a smooth, good looking surface and a rich velvety green color. That is why it is best to sow mixtures for it is only by combining the desirable tested qualities of several grasses that the best lawn grass results can be obtained. Our lawn trials are established at our own Nursery Gardens, where they are grown under actual lawn conditions and where visitors may judge them as well. Visitors are always welcome at our Nursery where they may see the lawns for themselves, and are invited to ask questions about lawn making and lawn care. For out-of-town friends, we have LAWN TIPS which will be sent on request.

LAWN TRIALS AT OUR BLUE GLASS NURSERY, 19th AVE. AT SLOAT BLVD.

EVERGREEN LAWN

This is our best "dual-purpose" lawn mixture. It is composed of moderately fine leaved grasses of upright habit of growth, grasses which will make a deep rooted turf and withstand the extremes of winter freezing or hot summers. The fine wiry leaves are rich dark green in color and make a very attractive front yard, and also have sufficient endurance for the hard usage of the backyard. It remains green throughout the year. If mowed at regular intervals and "dressed" occasionally it will make a very fine and attractive lawn.

Sow 1 lb. to 10x15 ft., or 150 square feet.

LAWN CARPET

This is our prize blend of the finest leaved grasses for the most attractive lawn. It is dark velvety green—makes a good smooth turf, and when well established becomes a thick carpet-like lawn, which is not only beautiful, but serviceable as well. It grows in all sorts of soils and climates, from the cool coastal areas to the hot interior valleys, and always with gratifying results.

We have established lawns of all our mixtures at our own NURSERY GARDENS and LAWN CARPET always gets highest rating. It has a fine, smooth, carpet-like surface right after mowing and maintains its fresh dark green color at all times. We mow our lawns once a week and dress them as often as necessary to keep them in good condition and LAWN CARPET always looks fresh and inviting. If you have time to take care of your lawn properly (and lawns do need care) LAWN CARPET MIXTURE will give you the kind of lawn of which you will be proud.

PARK LAWN thrives in the sun; and will grow in light or heavy soils. It will withstand the cold winters and hot summers and yet it is one of our best wear resistant grasses in the cool climate of San Francisco.
